# Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does

The page has a logical tab order

Visual order on the page follows DOM order

User focus is not accidentally trapped in a region

The user's focus is directed to new content added to the page

HTML5 landmark elements are used to improve navigation

Offscreen content is hidden from assistive technology

Custom controls have associated labels

Custom controls have ARIA roles
